Investment Analysis & Comparison — 3 CE Hours

This course will show you how to use performance measures to compare properties, decide whether to buy, or decide it's best to sell. You will learn how to examine snapshot comparisons, especially cap rate and cash-on-cash, look at how the value of money is related to time, calculate the Internal Rate of Return, and go beyond number crunching to examine the key aspects of a market analysis. After the course, you will have the tools you need to effectively evaluate your commercial real estate decisions.
